**Proposed District 3 Service Area
(Northern Nash District)**

This map illustrates the proposed District 3 Service Area (Northern Nash District) for the Northern Nash Water System. The service area is highlighted in light green and is bounded by a red line representing the town limits of Dortches and Red Oak. The map shows a network of blue lines representing the proposed water system, which includes various residential streets and major thoroughfares. The map also displays parcels, major roads (including I-95, US 264, and US 64), and city limits for Nashville and Rocky Mount. A legend in the top right corner provides a key for the symbols used, and a scale bar indicates that 1 inch equals 1,600 feet. The Nash County Geographic Information Systems logo is also present.
